See why Exceed XP 7 is ideal for stretch hood application

TexTrude uses Exceed XP 7 performance polyethylene to create innovative stretch hood solutions. This new series of performance PE enables the creation of stretch hood films combining HEVA equivalent elasticity with high holding force for pallet stability.

See how they did it

Industry solutions Enhancing the toughness and sealing performance of heavy duty sacks for salt and other fine powders

Along with the collaboration of ExxonMobil's technical and sales team and its local distributor, Primaplas, Pope Packaging conducted an extrusion trial using a cost-effective coex structure based on ExxonMobil performance polyethylene products. With Enable and Exceed XP performance PE, they enhanced the toughness and sealing performance of heavy duty sacks for salt and other fine powders.

Industry solutions: on demand Contributing to a circular economy: a study in recycled shrink films

Manufacturing lubricants for the wind industry provides plenty of opportunities - and challenges. To compete in the marketplace, your lubricants must meet increasing demand for long drain intervals and reliable performance in extreme conditions, especially in low temperatures.

Industry solutions Greenhouse films with Exceed XP 7 performance polyethylene

Greenhouse films that are tough, clear, and soft can now be fabricated by converters due to the extreme dart and puncture resistance offered by Exceed XP 7021 and Exceed XP7052. Watch the video and learn more about the tests we conducted.
