# Elevexx<sup>®</sup> 0800 AO linear alpha olefin

#### Together, we win

This linear alpha olefin can be used as a comonomer to manufacture plastomers, elastomers, and performance polyethylene, which in turn are made into end products such as tubing, seals, gaskets, and grip materials. This product can also be utilized as a raw material in the polyalphaolefin industry to produce high performance lubricants. Elevexx<sup>™</sup> linear alpha olefins deliver an ultra-high purity of 1-octene that is required by these applications.
