Case study | Valgroup continues its plastic circularity journey with certified-circular* polymers from ExxonMobil leveraging Exxtend™ technology for advanced recycling

By purchasing verified-circular polymers from ExxonMobil, Valgroup is the first company in leveraging Exxtend technology in South America, unlocking new opportunities towards a more circular economy for plastics. Through them, one of the largest global beverage producers is able to launch a printed collation shrink package using 100% certified-circular polymers.

Case study | Creating ultra-thin hygiene compression packaging films with sustainability benefits that deliver excellent performance

A thorough collaboration throughout the full value chain has led to the development of two monomaterial PE film solutions. By leveraging just three PE grades, it is possible to reduce the film thickness and/or incorporate up to 35% recycled content while still meeting performance and processability requirements.

Upcoming event | PLASTIMAGEN® MEXICO 2025

Connect with us at Plastimagen25 and discover how our Signature Polymers including Vistamaxx™, Exceed™, and Exact™ can assist with a variety of applications and meet your needs with mechanical recycling and Exxtend™ technology for advanced recycling.

[Learn more](#)

*Certified-circular plastics are virgin-quality plastics that are accompanied by an ISCC PLUS "Sustainability Declaration" that matches the mass of the virgin-quality plastics that we sell to a corresponding amount of plastic waste that we transform back into usable raw materials through advanced recycling.
