Case study

ExxonMobil, Cyclyx, Sealed Air, and Ahold Delhaize USA collaborate to create a circular food packaging waste solution

The project collects flexible plastic packaging from grocery stores that are broken down via advanced recycling into feedstocks that can be attributed (via mass balance) to certified-circular polymers which can then be used to create new food-grade packaging.

Value chain collaborations

Hygiene compression packaging films with sustainability benefits that maintain performance

Discover the two hygiene compression packaging films solutions: one with film thickness downgauged by over 40%, a second including 30% PCR content; both developed with Exceed™ XP and Enable™ performance polymers content which help deliver high integrity films.

[Discover now](#)

Value chain collaborations

Recyclable* full-PE laminated pillow pouch for packaging with sustainability benefits

This story highlights a collaboration with Nordmeccanica to create a solution that enables high quality mono-material packaging structures that can be mechanically recycled*.

Innovative solutions

Help builders protect their infrastructure with extremely damage-resistant liners

Exceed™ XP performance polymers enable converters to fabricate extremely-damage-resistant film that can improve the ability to protect and preserve buildings for potential improved energy efficiency and safety.
