## ExxonMobil shares carbon footprint assessment of proprietary advanced recycling technology

While we understand the benefits of our co-processing technology in terms of scale and capabilities, we also wanted to know how it compared in terms of carbon footprint to the base case when we run the units without waste plastics.

## TenCate Grass launches first-of-its kind synthetic turf recycling program in the U.S.

Keeping synthetic turf out of landfills and putting it back to use is the objective behind TenCate Turf Recycling Solutions, a groundbreaking initiative just announced by TenCate Grass, the world's leading manufacturer, distributor and installer of synthetic turf for sports and landscape applications.

This collaborative effort leverages ExxonMobil's Exxtend™ technology for advanced recycling in a first-of-its-kind program.

## In the news | Cyclyx, ExxonMobil, and LyondellBasell advance first-of-its-kind plastic processing facility

The new facility addresses a critical missing link in the plastic waste supply chain by connecting community recycling programs to new and more advanced recycling technologies that have the potential to take a much wider variety of plastic materials.
