Behind the scenes

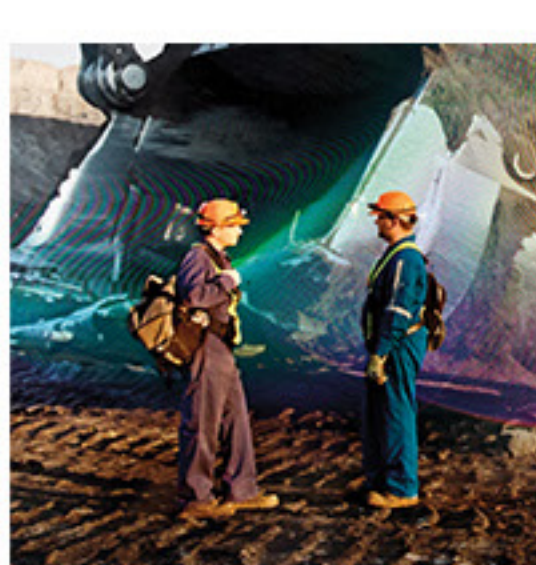

We are there when you need us, where you need us

We offer a broad portfolio of technically advanced synthetic base stocks, including low- and high-viscosity PAO, mPAO, esters and alkylated naphthalene.

Lubricant formulators around the world rely on the global resources and technical expertise of ExxonMobil Chemical to support their efforts and help solve challenges. Take a look at the people committed to your success.

Technical research

High-performance with blending flexibility

Get the data and details on a new high-viscosity solution that capitalizes on the enhanced properties of metallocene polyalphaolefin (mPAO) while offering lower treat rates and better viscometrics than alternative high-viscosity base stocks.

Case study

Lube manufacturer succeeds in crowded market

Wuhan BODA lubricant company uses ExxonMobil's reliable supply of SpectraSyn Elite™ mPAO base stocks to grow in China's competitive lubricant marketplace.

Product spotlight

Low viscosity, high performance

SpectraSyn Plus™ PAO is an advanced low-viscosity synthetic base stock that sets a benchmark for low volatility and low-temperature fluidity to produce more advanced lubricants, from rail tracks to wind-turbine bearings.

Synovation

Ready to synovate?

The first video in our new Synovation series explores a key question: Synthetic or mineral base stocks? These short, lively, animated videos dramatically explain how synthetic base stocks can benefit your finished lubricants and your business.

Events

See you at STLE

Stop by our booth at the 74th STLE Annual Meeting & Exhibition in Nashville, Tennessee, May 19-23, 2019. Industry, academic and government researchers come together to learn and share best practices and technological advances in tribology and lubrication engineering. Find out about STLE and other key upcoming industry events.
