

# **Santoprene™ TPV grade**

## **Cross-reference to material database ID numbers**

- IMDS (International Material Data System)**
- CAMDS (Chinese Automotive Material Data System)**

**Revision Date: January 2020**

Supersedes Date: July 2018

### **Introduction**

Automotive manufacturers (OEMs) require materials to be listed in material databases to support End of Life Vehicle regulations. There are currently two material data systems, IMDS and CAMDS.

This document provides a cross-reference of commercially available Santoprene TPV and Geolast™ TPV grades with the Material ID number used in each database.

Since all records on Santoprene and Geolast TPVs are published in these databases, this ID number can be used in the database search menu to easily locate the information on a particular TPV grade within the database.

This list is reviewed on a regular basis but may contain grades that are no longer commercially available or grades that have recently been placed in the database.

Please contact your Customer Service or Sales Representative if you cannot find an ID number for a particular Santoprene TPV grade you need. [Contact Us](#)
