Technical Spotlight

Grease it up!

Find out how high-viscosity metallocene PAO base stocks offer grease formulators enhanced low- and high-temperature performance in our new technical video titled: [Metallocene polyalphaolefins \(mPAO\) - high performance base stock for synthetic grease applications.](#)

[Watch the video](#)

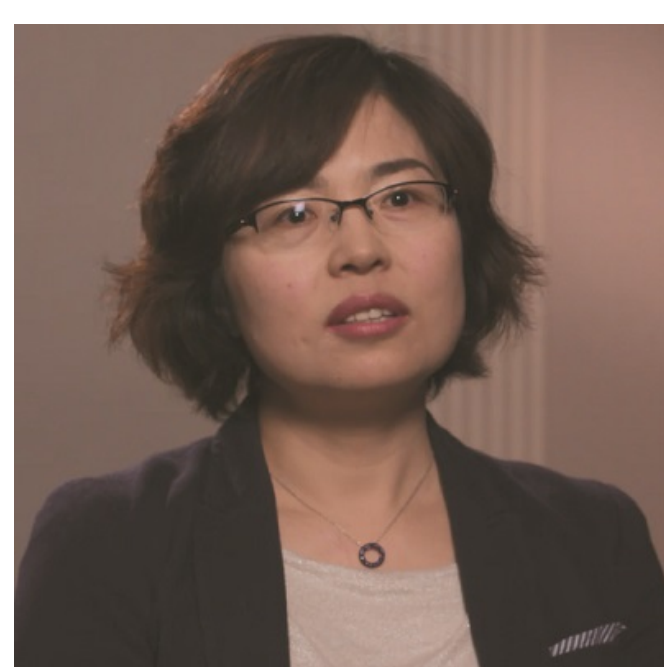

Educational video

Synthetic satisfies

Base stocks can be refined from crude oil or purpose built to give specific qualities to the lubricants they are used in. Qualities include enhanced wear protection, lower temperature fluidity and longer drain intervals. See how synthetic base stocks surpass mineral.
