### Case study

#### Sustainable collation shrink packaging

Collation shrink packaging can now be made using recycled polyethylene and virgin performance polyethylene (PE) polymers without compromising performance.

### Case study

#### Every season is growing season with Exceed XP

Northern China's winters are too cold to grow vegetables outdoors. See how Exceed™ XP performance PE polymers portfolio of products offers solutions to fabricate extremely damage-resistant, large lay-flat films that help farmers protect and grow their fruit, vegetables and flowers – throughout the year.

### COVID-19 support

#### Mobilizing forces to protect hospital workers in Spain

When an innovative customer in Spain quickly transformed its production lines to provide protective products for frontline medical workers, we wanted to help right away. ExxonMobil, along with other leading polyethylene suppliers, donated raw materials to Armando Alvarez Group, which is now manufacturing and distributing protective coveralls for hospitals at no charge.

### Upcoming webinar

#### Answering the call for sustainable PE film solutions.

**Wednesday, November 18, 10:00 am, Central Standard time (UTC -6:00)**

Tyler Baran and Tom Miller will present an overview of several mechanically recyclable, flexible packaging solutions for primary and secondary packaging. This is a short webinar providing a high-level overview of resin and package performance. Detailed follow-up discussions are welcome and will be arranged after the presentation.
