Major digital event

We invite you to our online event to see the products, understand the technologies and hear the trends that will help shape the future of the plastics industry. Each session requires you to register separately. There will be sufficient time for sessions to conclude and allow attendees to log on to the next timeslot. (Note that there is no charge for this event)

Why attend:

- Receive information you can't get anywhere else, direct from EM and industry experts
- Gain access to live and on-demand presentations and discussions
- Submit questions in advance or join live Q&A during the event

Heavy duty sacks

Creating heavy duty sacks with sustainability benefits: The value chain working together.

See how Selene, ExxonMobil, W&H and Aventus and worked together to develop, create, test and fill heavy duty sacks with films containing 50% post-consumer recycled (PCR) PE content using ExxonMobil's Exceed™ XP 8318 and Exceed 1012 performance polyethylene resins. Learn what each company contributed and evaluate the results.

Exceed™ performance polymers

PVC powder packaging using Exceed™ XP performance polyethylene-based HDS solutions

Heavy duty sacks (HDS) made with Exceed™ XP performance polyethylene (PE) offer such an excellent toughness/stiffness balance they can replace paper block bottom valve bags (BBVB) and paper-plastic bags used to package PVC powder. Thanks to Exceed XP performance PE, this HDS solution can reduce the risk of PVC powder leakage, while lowering sack costs.
