New product introduction

New Exceed™ XP 7 performance polyethylene grades for “remarkable” mechanical performance

Introducing new Low Density Exceed™ XP 7 performance polyethylene. These new grades will help you to create:

- Stretch hood films combining HEVA equivalent elasticity with high holding force for pallet stability;
- Collation shrink films at low temperatures for potential energy savings from lower energy use;
- Primary packaging films at low seal initiation temperatures for fast sealing; and
- Greenhouse films with remarkable softness and clarity combined with dart and puncture resistance for integrity.

Technical whitepaper

Future trends in the flexible packaging industry

While demand for chemicals and plastics is being fueled by a growing global population and middle class, other trends are affecting the packaging landscape. Read ExxonMobil’s view of what will impact the flexible packaging industry moving forward in this technical whitepaper.

Case study

Pet food sacks with enhanced performance eliminate the need for extra packaging

Plastical wanted to enhance pet food sack performance to eliminate deformation during stacking. See how they used sack film including Exceed™, Exceed™ XP and Enable™ performance PE polymers to boost performance and keep tails wagging...

On demand webinars

Access PE Innovation Week presentations on-demand

The wait is over! If you missed our PE Innovation Week, you are in luck. You can now access six sessions on demand focusing on topics such as ways to help increase crop yields with performance films, how to create high performance stretch films and an introduction to Exceed XP 7 polymers. *Note that some sessions require registration
