

Exceed™ Flow m 0520.CB

(Legacy name: Enable™ 2005CB)
Metallocene Polyethylene

Product Description

General

Exceed™ Flow m 0520.CB resin is an ethylene 1-hexene copolymer. Exceed™ metallocene polyethylene resins offer an outstanding balance between processing and film properties, including tensile, impact and puncture. Easier processing and excellent properties lead to significant high pressure LDPE replacement in many applications, yet with superior drawdown and enhanced toughness. Exceed™ Flow m 0520.CB resin is available for blown film, both formulated and non-formulated.
