

# Vistalon™ 7602

## Ethylene Propylene Diene Terpolymer Rubber

### Product Description

Vistalon™ 7602 EPDM rubber is a high ENB polymer with low ethylene content and medium Mooney viscosity. It has a broad molecular weight distribution for excellent compounding processability. It is applicable for extruded applications like weatherseals and glazing seals that need fast cure rate and good compression set. It may also be used in molded applications requiring fast cure rates. The product is manufactured as pellets which fuse (agglomerate) during storage and transportation.

### Key Features

Designed for:

- Excellent processability resulting in shorter mixing and molding times
- Good low temperature properties, including flexibility and compression set
- Fast cure rate and high cure state

### General

Availability <sup>1</sup>	<ul style="list-style-type: none"> <li>▪ Africa &amp; Middle East</li> <li>▪ Asia Pacific</li> </ul>	<ul style="list-style-type: none"> <li>▪ Europe</li> <li>▪ Latin America</li> </ul>	<ul style="list-style-type: none"> <li>▪ North America</li> </ul>
Form(s)	<ul style="list-style-type: none"> <li>▪ Fused Pellets</li> </ul>		
Revision Date	<ul style="list-style-type: none"> <li>▪ 01/25/2024</li> </ul>		

Physical	Typical Value (English)	Typical Value (SI)	Test Based On
Mooney Viscosity <sup>2</sup> (ML 1+4, 257°F (125°C))	65 MU	65 MU	ASTM D1646 (mod)
Ethylene Content <sup>3</sup>	55.0 wt%	55.0 wt%	ASTM D3900A
Ethylidene Norbornene (ENB) Content	7.5 wt%	7.5 wt%	ASTM D6047(mod)

### Notes

Typical properties: these are not to be construed as specifications.

<sup>1</sup> Product may not be available in one or more countries in the identified Availability regions. Please contact your Sales Representative for complete Country Availability.

<sup>2</sup> Radial cavity dies, polymer remassed at 145+/- 10°C.

<sup>3</sup> Ethylene and VNB measured on reactor samples before oil injection. Product testing (if necessary) will use MEK extraction technique. Ethylene bias is 0.4 wt% and is subtracted from extracted product results, then compared to reactor spec of 59.0-65.0. No bias exists for VNB. Extracted product results are compared to reactors spec of 0.55-0.85.
